PROFESSIONAL SUMMARY

I am a degreed Software Engineer, certified by Oracle in Cloud Computing (OCI Foundations), specializing in architecting and delivering modern, scalable web applications with a focus on security, performance, and reliability.

My core strength lies in accelerating the software development lifecycle through advanced AI orchestration: I design system architectures, model relational databases, and drive end-to-end full-stack delivery (Next.js, Node.js, Express, Docker, and PostgreSQL), turning business requirements into enterprise-grade software with rapid delivery velocity.

I combine this engineering capability with extensive corporate experience in advanced technical support and complex troubleshooting under SLA pressure at Intelbras, alongside a proven track record of institutional governance and technical media leadership at Igreja Lagoinha.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Software Engineering & AI**: System Architecture, AI-Driven Development, Relational Database Modeling, RESTful APIs, Code Auditing, Security Best Practices.
- **Languages & Frameworks**: JavaScript, TypeScript, Node.js, Next.js, React, Express, Python (scripting and automation), HTML5, CSS3, Tailwind CSS.
- **Databases & ORM**: PostgreSQL, Prisma ORM, Redis, Supabase.
- **DevOps, Cloud & Infrastructure**: Oracle Cloud Infrastructure (OCI Certified), Docker, Docker Compose, Nginx Reverse Proxy, Git/GitHub, IP PBX, VPN/Tailscale, SSH, Linux, Windows.
- **Cybersecurity**: Identity and Access Management, OWASP Guidelines, Encrypted SSH Key Pairs, Microsoft SC-900 & CECyber coursework.
- **Operations & Tools**: Auto W Logistics System, Salesforce CRM, Wireshark, OBS Studio, Agile/Scrum.

PROFESSIONAL EXPERIENCE

Envia Peças — Santa Catarina, Brazil
Inventory Verification Associate (Conferente) | 06/2026 – Present

- Verified picked automotive parts against customer orders using the Auto W system.
- Staged and cleared verified packages for the motorcycle dispatch team.

Igreja Batista da Lagoinha — Santa Catarina, Brazil
Executive Administration & Technical Media Leadership | 04/2024 – 09/2026

- **Executive Secretary (06/2025 – 09/2026)**: Directed institutional administration, maintaining church documentation, membership governance, and official records in coordination with pastoral leadership.
- **Media & Live Streaming Leader (04/2024 – 07/2026)**: Directed and mentored a volunteer media team responsible for visual content, projection, and weekly multi-camera live broadcasts via OBS Studio and

streaming platforms.

- **Technical Automation**: Developed custom scripts and a secure remote administration system using Tailscale private mesh VPN and key-authenticated SSH to manage and maintain all media and broadcast PCs.

Intelbras S/A — Santa Catarina, Brazil
Telecommunications Technical Support Analyst | *08/2022 – 05/2025*

- Provided tier-2 technical escalation support and consulting to corporate partners, certified integrators, and enterprise clients across Brazil.
- Troubleshot and resolved complex incidents involving IP PBX telephony servers and VoIP gateways.
- Conducted data traffic diagnostics and packet analysis using Wireshark; managed ticket lifecycles and SLAs in Salesforce CRM.

ND Express — Palhoça, SC, Brazil
Logistics Dispatch & Operational Support Associate | *09/2018 – 04/2022*

- Issued and verified electronic transport manifests and tax documents for road cargo transportation compliance.
- Provided first-level hardware and systems support to local operations, including network printer setup, PC troubleshooting, and operational spreadsheet controls.

FEATURED SOFTWARE & AUTOMATION PROJECTS

Barbershop SaaS Platform | *Software Architect & Developer*

- Multi-tenant cloud SaaS system engineered for commercial barbershops and salon operations.
- **Stack**: Next.js 15 (App Router), React 19, TypeScript, Tailwind CSS, Express, Prisma ORM, PostgreSQL 15, Redis, and Docker.
- **Key Features**: Real-time customer self-scheduling, POS/cashier flow, automated commissions, inventory management, and secure JWT authentication.

OrcamentoPrint3D | *Software Architect & Developer*

- Comprehensive web platform for technical 3D printing cost calculation (FDM and Resin) and ecosystem management.
- **Stack**: React, TypeScript, Vite, Zustand, Tailwind CSS, Three.js, and Supabase.
- **Key Features**: In-browser 3D STL inspection via Three.js, automated PDF quoting, printer and material management, integrated marketplace, community features, and native API integrations with manufacturers (Bambu Lab, Creality, Anycubic).

Custom Remote Workstation Manager (SSH / Tailscale) | *Systems Developer*

- Custom automation setup developed to securely manage and troubleshoot remote church media and live broadcast PCs from anywhere.
- **Stack**: PowerShell, Bash, Python, Tailscale private mesh network, and passwordless SSH key authentication for remote reboots, kiosk controls, and software restarts.

EDUCATION

- **Bachelor of Science in Software Engineering**
  UNOPAR — Universidade Norte do Paraná | *Conferred: January 2025*

OFFICIAL CERTIFICATION

- **Oracle Cloud Infrastructure (OCI) Foundations Associate** — Oracle Corporation (08/2023)

SPECIALIZED TRAINING & PREPARATORY COURSES

- **Cybersecurity**: From IT to Cyber (CECyber - Prep & Placement Program), Best Practices in Cybersecurity & Network Fundamentals (IBSEC).
- **Cloud & Systems**: Microsoft SC-900, MS-900, and AWS Discovery Day preparatory courses — Ka Solution.
- **Telecommunications**: Enterprise IP Telephony and Routing Certification Series (Intelbras Academy).
- **Agile & IoT**: Agile Projects with Scrum and Kanban (DIO), IoT & Sensor Programming (UNOPAR), Project Management (UNOPAR).

LANGUAGES

- **Portuguese**: Native
- **English**: Technical / Working Proficiency (Strong reading comprehension for technical documentation, specifications, and code; actively developing conversational fluency).
